

The E+ Program

The Ministry of Commerce and Industry during its SBA 2015 MSME Conference launched the first phase of the program with support from the Government of Japan through its LIFE Fund and the International Finance Corporation. The project is intended to put life into 10 key sectors of the economy and to foster government inclusive growth agenda. Some of the sectors under the project are packaging, sausage production, fruit juice production, labelling, etc.

The project is a youth entrepreneur empowerment program designed to promote youth entrepreneurship through training and access to finance. The program seeks to identify and promote the next generation of promising youth innovators with great ideas and solutions to real challenges in business and society.
